Before & After

DIGITAL LIBRARY

CASE #1

6-year-old DSH with a history of Flea Allergy Dermatitis with non-healing lesion on chin

Phovia application #1

Day 7

Submitted by Shelby Brown

## CASE # 2

**Aspen:** ~8-month-old stray male domestic short hair brought to Dr. Vanessa Adams at PGA Animal Clinic by a rescue organization (Palm Beach Purrs). He was found roaming the streets in Clewiston, FL. Diagnosed with endo- and ectoparasites, and suffering from what's suspected to be chemical burns covering much of his body. He was given Convenia, dewormer, and pain meds and began Phovia on 2/11/22.

February 10, 2022: After preparing the lesion. Phovia application #1 next day

February 16, 2022: No Phovia

February 20, 2022: 2 days after Phovia application #2

## Aspen:

February 25, 2022: Phovia #3

March 4,, 2022: Phovia application #4

March 9, 2022: No Phovia

## Aspen Now Ready for Adoption
